

SUPER SECURITY IN A SUPERFAST MOBILE AGE

WE'RE IN A SUPERFAST MOBILE AGE

Businesses are facing new challenges in security and mobility

There's a growing need to mobilise business applications and content

More data is being accessed and shared between devices, than ever before

Our workforces are becoming more mobile

The DNA of company fleets is changing, with a wider range of device operating systems and 'Bring Your Own Device' (BYOD) policies

And security is critical

SUPERFAST MOBILITY IS TRANSFORMING BUSINESSES

Businesses across the UK are empowering their workforces through superfast mobile data.

Giving their employees access to the information they need to do business

This is the first step in our vision for Total Enterprise Mobility

Making organisations more **effective**, more **efficient** and more **flexible**.

Ensuring this mobilised information stays secure regardless of device is key

MOBILE SECURITY FOR ALL DEVICES

We partner and innovate with the **best technology** providers in the market

Providing you with security solutions for all major device operating systems that are easy to use and managed centrally

Giving your organisation **flexible tools** to manage devices, network access, application and content deployment

Enabling **secure mobile access** to the critical data and business applications your employees need to do business

So you can deploy the security policies that are right for your organisation, **regardless of fleet mix today and tomorrow**

SEAMLESS PROTECTION BUILT IN

Security and speed are at the heart
of our 4GEE service

Our unique range of 4GEE plans have
security built-in as standard

Supporting all your security needs

Allowing you to have a
Totally Mobile workforce

SUPER SECURE
SOLUTIONS
TAILORED TO
YOUR NEEDS

Supporting all levels of your security needs, we've developed three tiers of Super Secure 4GEE solutions:

SUPER SECURE 4GEE STARTER

Provides a hosted Mobile Device Management service from the market leaders, MobileIron. Simple and quick to set up and designed for small and medium organisations that need to be able to secure and manage their fleet of smartphones.

- Configure and provision email, VPNs and Wifi
- Restrict access to device features such as camera and data roaming
- Enforce a password policy to secure devices
- Remotely lock and wipe lost devices
- Distribute and recommend business-oriented applications

SUPER SECURE 4GEE ENTERPRISE

Secure, manage and control your smartphone devices with either a hosted or on-premise solution. The market-leading MobileIron service can be integrated into your IT systems to provide a higher level of security and control.

- Manage all smartphones from one management portal
- Fully configure, provision and lockdown your devices
- Distribute and manage applications easily
- Connect directly to your Active Directory
- Only allow authorised and compliant devices to connect to your network

SUPER SECURE 4GEE ENTERPRISE PLUS

To get more from your investment in your mobile devices, then further mobilise your workforce with enhanced content, application and device management services or with Samsung KNOX.

- Allow secure access to business content
- Manage and secure business applications
- Ensure content in transit is secured
- Provide secure and controlled internet access

BEST FOR SECURITY AND A WHOLE LOT MORE

Offering device-agnostic security solutions, built-in as standard

Partnering with market-leading providers, MobileIron and BlackBerry

Providing the best security solutions now, and helping shape those of the future

Fully trained and accredited consultants to advise you of the best solution to meet your security and device management needs

Accredited delivery professionals that will work with you to install and test the services

Fully trained professional support team that specialises in MobileIron

Security is a real issue, and top of our agenda

A NETWORK FOR NEXT GENERATION BUSINESS

Our network is built to help businesses benefit from a mobilised world

No other network is **bigger, faster or more reliable**

Achieving the world's fastest 4G rollout

Boosting speed of 4GEE to as much as **300Mbps**

With enough spectrum to future-proof the growth in mobile data traffic

Reliability Index win and ties and Overall RootScore® Award win: based on RootMetrics UK, nation, and metro RootScore Reports for mobile performance as tested on best available plans and devices on 4 mobile networks across all available network types (July 2013 – June 2014). The RootMetrics awards are not an endorsement of EE. Your results may vary.
