

# Third-Party Cybersecurity, Shaped for Your Risk DNA.

Panorays tailors internal and external assessments for each unique third party, so you can easily scale your security to match any evolving level of threat.

## Unlock the Cyber Fingerprint of Every Third-Party

### Adopt a business approach to risk management.

Replace static risk scoring with an actionable, real-time risk rating reflecting the severity of the potential risk outcome.

### See your risk landscape light up with context.

Panorays assesses each Third Party up to the Nth level and maps the risks based on criticality, combined with your risk appetite and business KPIs.

### Detect threats for faster response.

Continuously monitoring your vendors, Panorays tailors your defenses - for prioritization and automated remediation.

### Scale your third-party security.

Panorays' AI-powered platform automates, streamlines, and expedites the third-party security process.

## Discover the Panorays Advantage

- Create Cyber Risk Assessments Based on Real Business Risk
- Gain Control With Continuous Supply Chain Detection and Monitoring
- Act on What Matters With Actionable Threat Alerts
- Fast-Track Remediation With Vendor Self-Guiding Plans
- Comply With Any Regulation (DORA, HIPAA, NIS2 and more)

# One Platform to Manage and Control Every Third-Party Risk

## Discovery & Mapping

Detect hidden Nth parties in your supply chain and understand how each connection impacts your business.

## Risk DNA Assessments

Validate questionnaires, cyber findings, and document evidence combined with your risk appetite.

## Continuous Threat Detection

Leverage AI to detect possible supply chain attacks, and alert you before they materialize.

## Remediation & Collaboration

When threats emerge, know immediately what to fix first and how.
